Applicant's Response

In Applicant's Response dated 06/30/2006, Applicant amended the Specification and cancelled Claims 18, 19, 21-25 and 35. Based on this response, the examiner deems the remaining claims (Claims 1, 4-7, 9-17, 33 and 34) allowable.

In Applicant's Response dated 05/30/2006, Applicant argued that the term "swapping" in the original Specification was an obvious error because the present invention clearly performs a "mapping" function rather than a "swapping" function, as repeatedly described in the original Specification. The examiner finds Applicant's argument persuasive. Thus, the objection under 35 U.S.C. 132(a) set forth in the Final Rejection dated 03/30/2006, for introducing new matter into the disclosure, is withdrawn.

Ex Parte Quayle Action

This application is in condition for allowance except for the following formal matters:

Specification

The disclosure is objected to because of the following informalities:

- The sentence "Additionally, the reconciliation algorithm has mapped component variable B to container variable 3 *of the document component 12* in the container assembly 11 or containing document." on Page 13, Lines 20-22 should be amended to – Additionally, the reconciliation algorithm has mapped component

variable B of the document component 12 to container variable 3 ~~of the document component 12~~ in the container assembly 11 or containing document. – so that it is clear that the “component variable B” is in the “document component 12” and the “container variable 3” is in the “container assembly 11.”

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
